

General Changes

1. **Contrast Issues:** Changed the light grey color used as annotation on forms from #94949c to #67676a to improve contrast.
Switched link and button color from #148dde to #0376c3
2. **Skipped Heading Levels:** Adjusted heading structure to avoid skipping levels (e.g., using <h5> directly after <h2>).
3. **Missing Form Labels:** Ensured all form controls have corresponding labels.
4. **Missing Fieldsets:** Grouped related checkboxes and radio buttons within appropriate <fieldset> elements.
5. **Orphaned Form Labels:** Ensured all form labels are correctly associated with their respective form controls.
6. **Flash message** – update h3 to h2 and fix contrast for “check completed” heading
7. **Page regions** – fixed page region for header and added role main to main container
